

WHAT IS 'RAIN WATER HARVESTING'

- ✘ Rainwater harvesting is a technique used for collecting, storing, and using rainwater for landscape irrigation and other uses
- ✘ The rainwater is collected from various hard surfaces such as roof tops and/or other types of manmade above ground hard surfaces
- ✘ Rainwater harvesting is the accumulation and deposition of rainwater for reuse on-site, rather than allowing it to run off
- ✘ Its uses include water for garden, water for livestock, water for irrigation water for domestic use with proper treatment, and indoor heating for houses etc.
- ✘ In many places the water collected is just redirected to a deep pit with percolation
- ✘ The harvested water can be used as drinking water as well as for storage and other purpose like landscaping
